

Annexe 7 : J'échange à l'oral et compare les enjeux du changement climatique sur l'agriculture et la biodiversité en France et au Bangladesh (mai-juin)

Défi final : Je transmets mes connaissances, échange et sensibilise mes pairs et les futurs élèves de seconde au lycée (liaison collège/lycée)

Conférence des élèves devant des collégiens de Dagneux, 31 mai 2024

Lycée de la Côtière → Europe Bangladesh connected Schools

Ujanburail Group 1 Bangladesh
 Dear all,
 Here is our final challenge!
 Our class has organised a conference in the high school with 3 other classes (Year 10 and 11, and another class from another middle school (Year 9) who had come on foot to our high school (a 45-minute walk from Dagneux, 5 km from La Boisse).
 We have presented our class project both in French and English before sharing our different experiences with the rest of the audience.
 Our conference was organised as such:
 - being aware of our carbon footprint
 - the impact of climate change on a local scale
 - the impact of climate change on a global scale with a focus on our Bangladeshi partners
 - how can we act
 We ended our conference with an online quiz.
 Some students were already eager to take part in the next session of the challenge My Little Planet (which helps us take actions to reduce our carbon footprint)
 It was very stressful to speak in front of such a great audience but we think we have managed to convey our message that everyone can act to reduce their carbon footprint.
 We are looking forward to hearing from your challenges!
